## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 30, 2003 has been entered.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 1, line 1, use of the term "improved" is improper, as it is unclear with respect to what the ladder is improved. The term should be removed.

In line 2 of claim 1, the applicant should recite that the ladder assembly has two extendable leg assemblies. In line 3, "larger" should be replaced with --the--, so as to avoid confusion as to the number of legs required. In line 5, "legs" should read --interior legs--, as it is unclear as to which legs the applicant has referred.

With respect to claim 6, there is no antecedent basis for "the extended legs". Also note that the metal pin has not been structurally located or attached to any particular element of the ladder assembly.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Grove #4,792,017. Grove, as best seen in Figure 1, discloses a metal telescopic ladder extension assembly comprised of hollow exterior leg components 16 (threaded), 18, threaded extendable interior legs 24, which are received within the hollow exterior leg components, and metal securing assembly 26, 28 (pin), used to secure the extendable leg in a desired position.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Planck et al #4,029,174. Planck, as best seen in Figure 2, discloses a metal telescopic ladder extension assembly comprised of hollow exterior leg components 11, 15 (threaded), and threaded extendable interior legs 17, which are received within the hollow exterior legs.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Martin #5,913,382, Saby et al #4,907,675, Huang #4,671,383, Gerber #4,209,078, Pears #4,090,586, Seyler #3,990,671, and Baumann #3,791,487 are cited to teach threaded ladder extensions and securing means.
